

# little Laurie Paper Doll Celebrates Halloween

Your cabinet is easy to assemble!

First cut-out all of the pieces

Next glue the back panel to the sides. Do this by folding the tabs in toward the printed cabinet background and glue the tabs to the inside of the side panels (the non decorative side) so the decorative side is facing outward and the printed back can be seen when looking inside the cabinet.

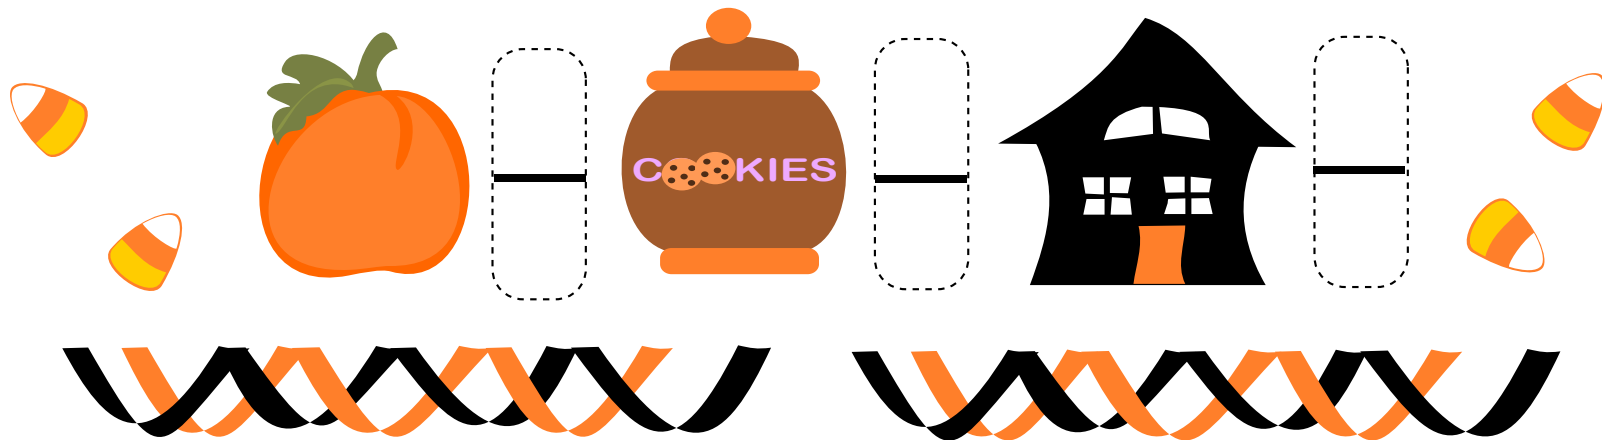

Finally add one of the large shelves to the bottom of the cabinet, and one small shelf to the top of the cabinet, folding the tabs down so the colored side of the shelf faces up.

Glue in place with a glue stick.

Add the other two interior shelves where you would like them placed in your cabinet!

Cut out the nick-knacks and use the tabs so they can stand on your shelf!
